## Artefact Design

Full Name: Rojina Basnet

Student Number: 2330469

Course: BSC (Hons) in Computer Science

Supervisor: Sagar Subedi

Reader: Jenny Rajak

Submission: 2/02/2025

## Artefact

A tangible deliverable or by product produced during a project's development, especially in software engineering and project management is called an artefact. A paper, model, diagram, source code, test case, or any other type of material that aids in system design, construction, testing or management can be used. Throughout a project's lifecycle, artifacts are crucial for tracking progress, preserving organization, and maintaining effective communication among team members.

## Product Backlog:

Product backlog is a prioritized list of all the work that needs to be done to create, improve, or maintain a product. (Radigan, 2025)

Student Module	As a student, I want to login securely so that I can access my account and resources	-Implement login form -Integrate login with the database for credential verification -Create a session for authenticated users	Must be
	As a student, I want to upload my documents so that I can submit them for review	-Design document upload interface -Create functionality to upload and store files -Display confirmation of successful submission	Must be
	As a student, I want to view feedback and comments from teachers so that I can improve my work	-Fetch feedback data from the database -Display feedback in a user-friendly interface	Should be
Teacher Guide Module	As a teacher, I want to login securely so that I can access my assigned projects	-Same as Student Login	Must be
	As a teacher, I want to review student project so that I can provide detailed feedback	-Fetch assigned student projects -Create a review interface -Store feedback and comments in the database	Must be
	As a teacher, I want to participate in presentation panels so that I can evaluate student presentations	-Implement presentation -Provide real-time feedback and grades -Store evaluation data in the system	Should be
Project Coordinator Module	As a project coordinator, I want to login securely so that I can manage projects and schedules	-Same as Login Functionality	Must be

	As a project coordinator, I want to create and manage project drives so that students and teachers can collaborate	-Design project drive interface -Implement drive creation and user assignment functionality	Must be
	As a project coordinator, I want to schedule presentations so that the time and venue are clear	-Create a scheduling interface -Notify users about schedules	Should be
Collaboration and Communication Tools	As a user, I want to send messages so that I can communicate effectively with others	-Design messaging interface -Implement message sending and receiving functionality	Should be
	As a user, I want to share files so that I can collaborate with my team	-Design file-sharing interface -Create functionality for uploading and sharing files	Could be
Plagiarism Checking	As a user, I want to check my documents for plagiarism so that I can ensure originality	-Integrate document upload functionality -Connect to plagiarism detection service -Display plagiarism report	Must be
	As a user, I want to receive feedback on how to improve originality so that I can address plagiarism issues	-Generate feedback based on plagiarism report -Display recommendations for improvement	Should be
Security and Backup	As an admin, I want data to be backed up regularly so that I can recover it in case of issues	-Design a backup process -Implement automated backup and encryption -Create restore functionality for backup	Must be
Notification and Alerts	As a user, I want to receive real-time notifications so that I stay updated on important events	-Implement notification triggers -Design a notification interface	Could be

AI Checking	As a user, I want to check my document for AI-generated content so that I can ensure authenticity	<ul style="list-style-type: none"> <li>-Implement document upload for AI analysis</li> <li>-Connect to AI detection system</li> <li>-Display AI analysis report</li> </ul>	Must be
	As a user, I want feedback on AI-generated content so that I can improve content authenticity	<ul style="list-style-type: none"> <li>-Generate actionable feedback</li> <li>-Display recommendations for content improvement</li> </ul>	Should be

### Functional Decomposition Diagram (FDD):

A tool used to break down a complex task or system into smaller and simpler parts. (HAYES, 2021)

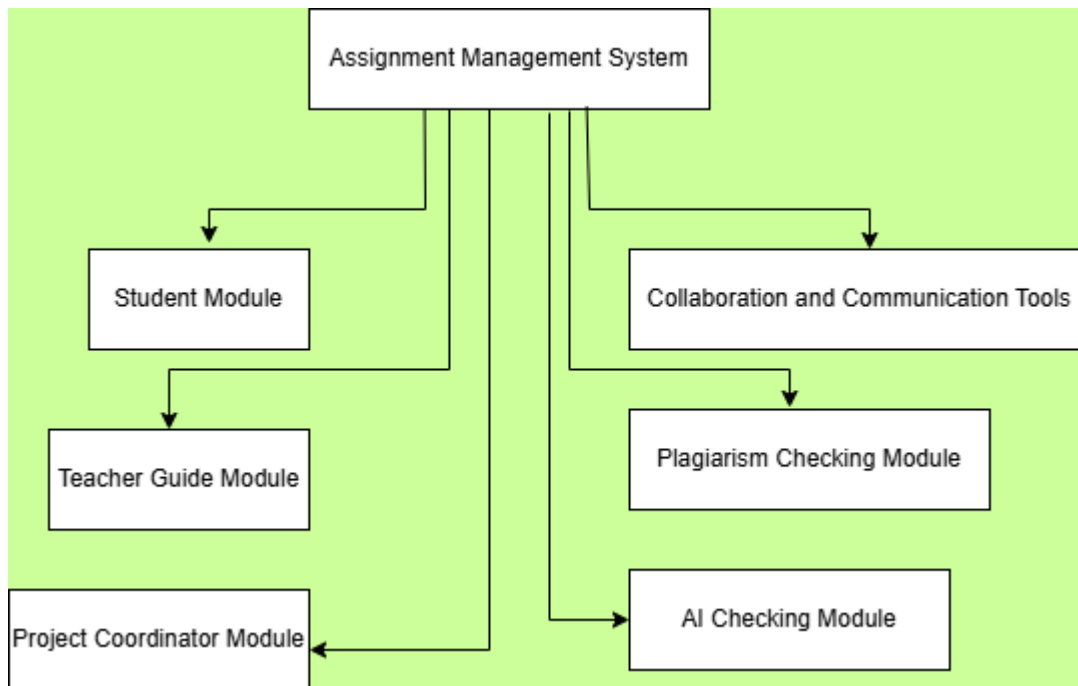

Figure 2:Functional Decomposition Diagram

### Legend

SM – Student Module

TGM – Teacher Guide Module

PCM – Project Coordinator Module

ACM – AI Checking Module

PCM – Plagiarism Checking Module

CCT – Collaboration and Communication Tools

### Requirement Types:

FR – Functional Requirement

NFR – Non-Functional Requirement

### Student Module (SM)

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R1-F-1.0	The system allows the student to login	Student Login	Must Have
R1-F-2.0	The system allows students to upload document for submission	Document Submission	Must Have
R1-F-3.0	Students can view feedback and remarks provided by teachers	Feedback Viewing	Should Have

### Activity Diagram

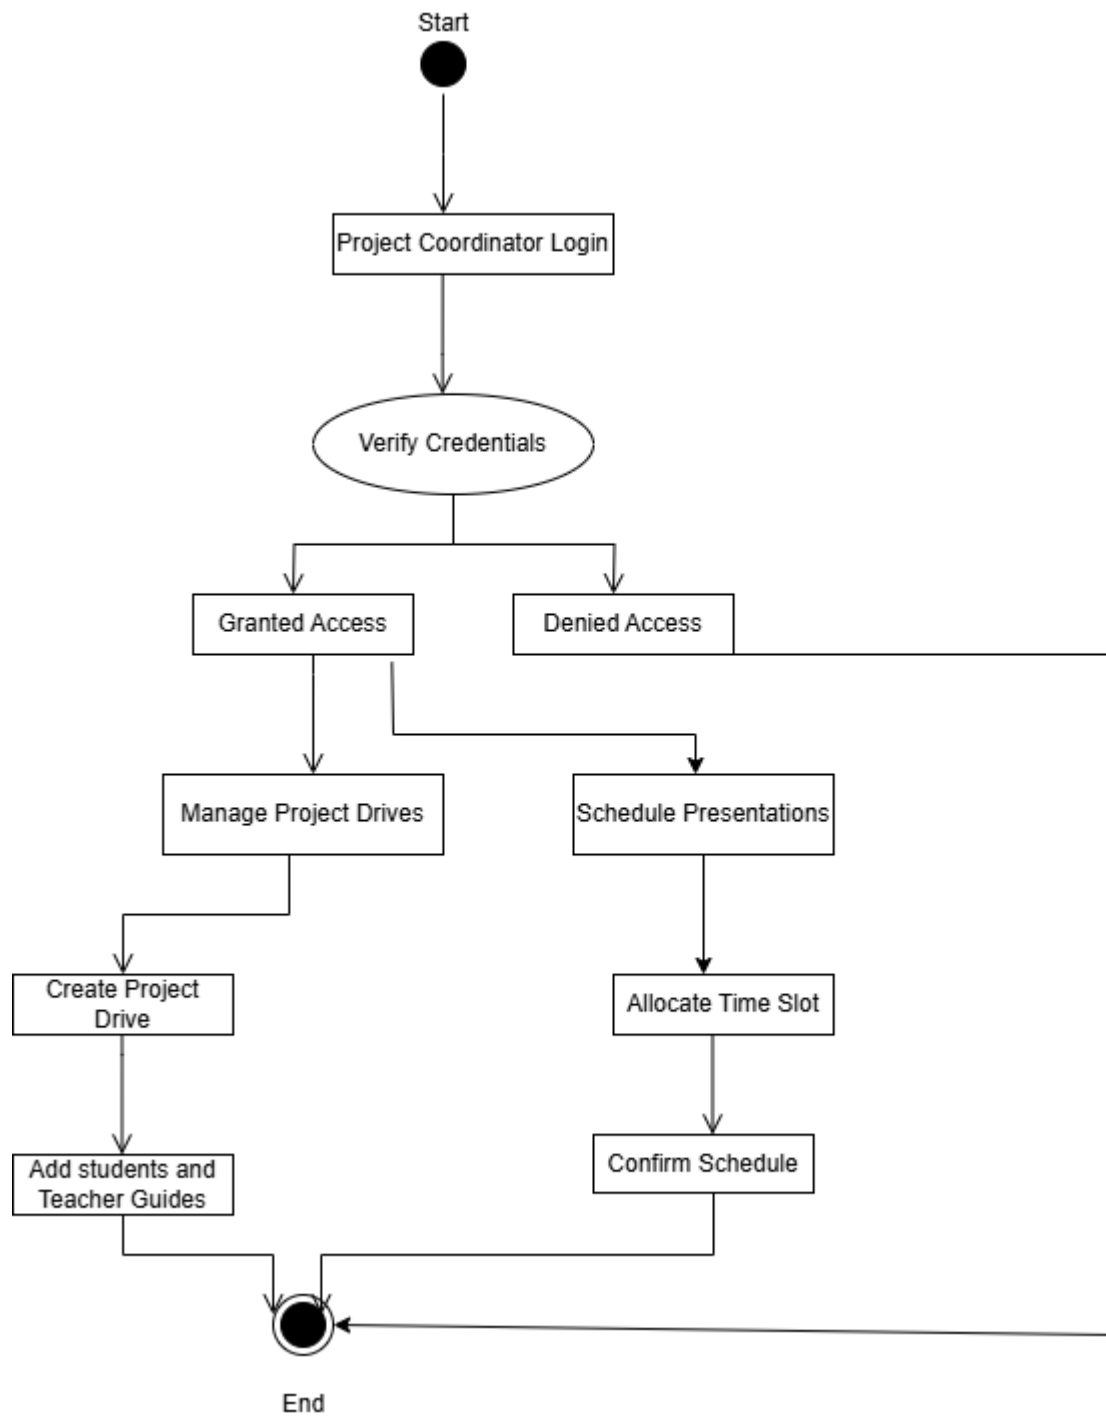

Figure 3:Activity Diagram for Student Module

## Use case diagram

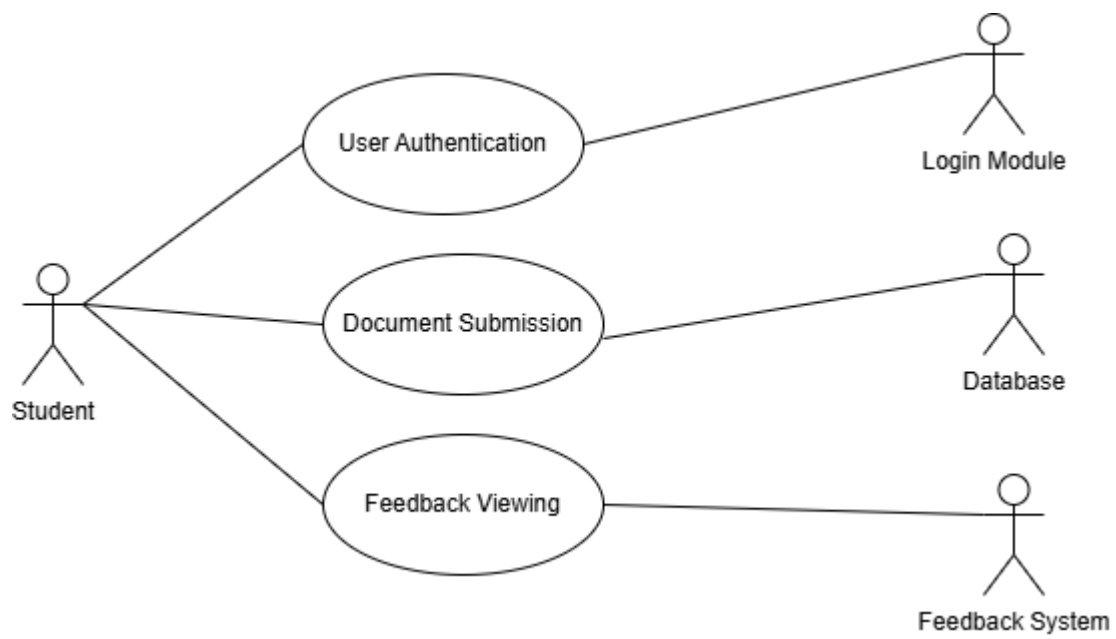

Figure 4: Use case diagram for Student Module

## Sequence Diagram

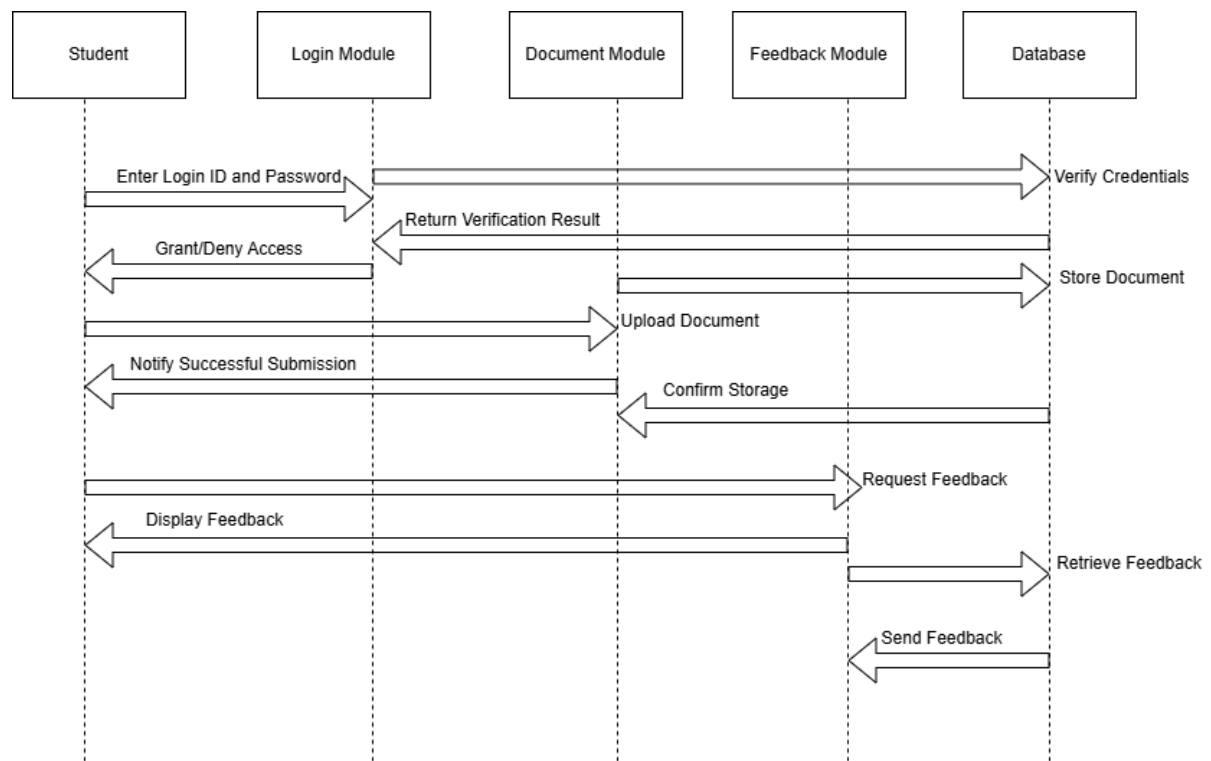

Figure 5: Sequence diagram for Student Module

### Teacher Guide Module (TGM)

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R2-F-1.0	The system allows the teacher to login	Teacher Login	Must Have
R2-F-2.0	Teachers can review student project reports and provide feedback	Student Project Review	Must Have
R2-F-3.0	Teachers can join presentations as a panel member and grade students	Panel Participation	Should Have

### Activity Diagram

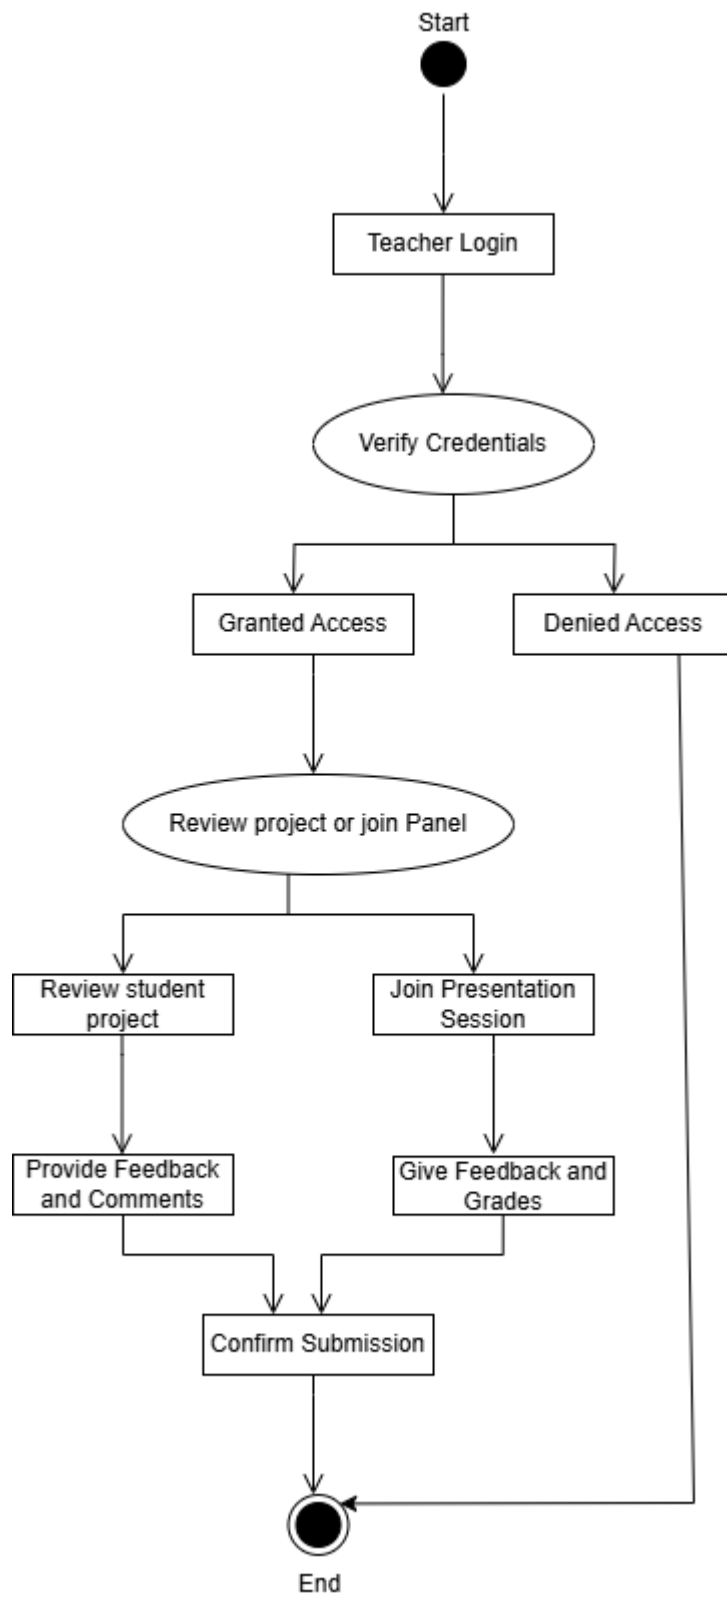

Figure 6:Activity diagram for Teacher Guide Module

## Use Case Diagram

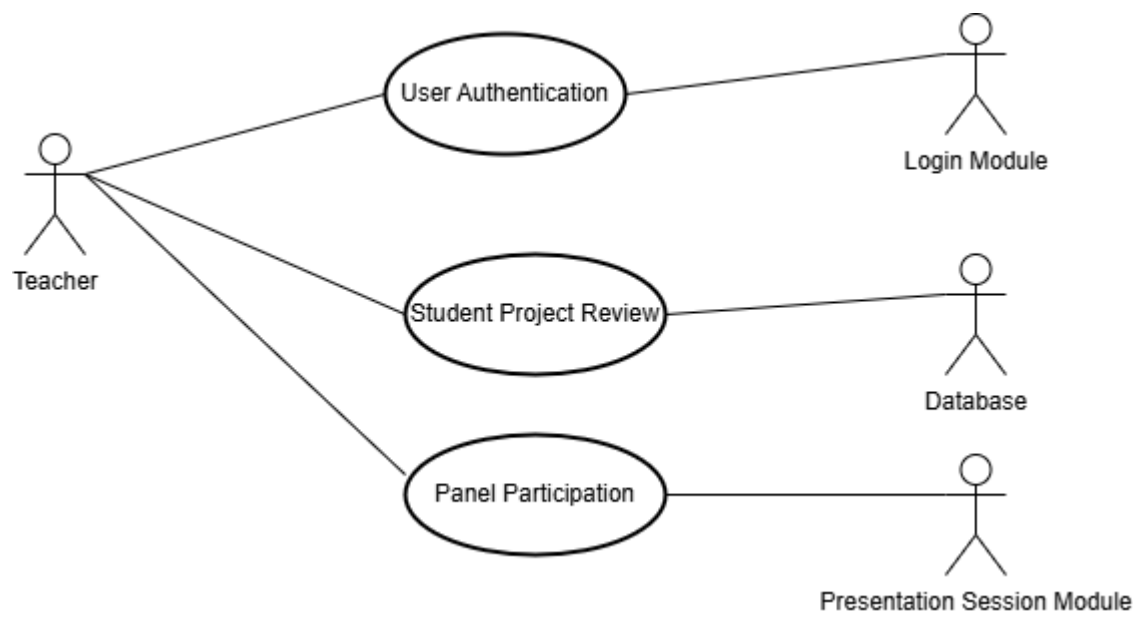

Figure 7: Use Case diagram for Teacher Diagram

## Sequence Diagram

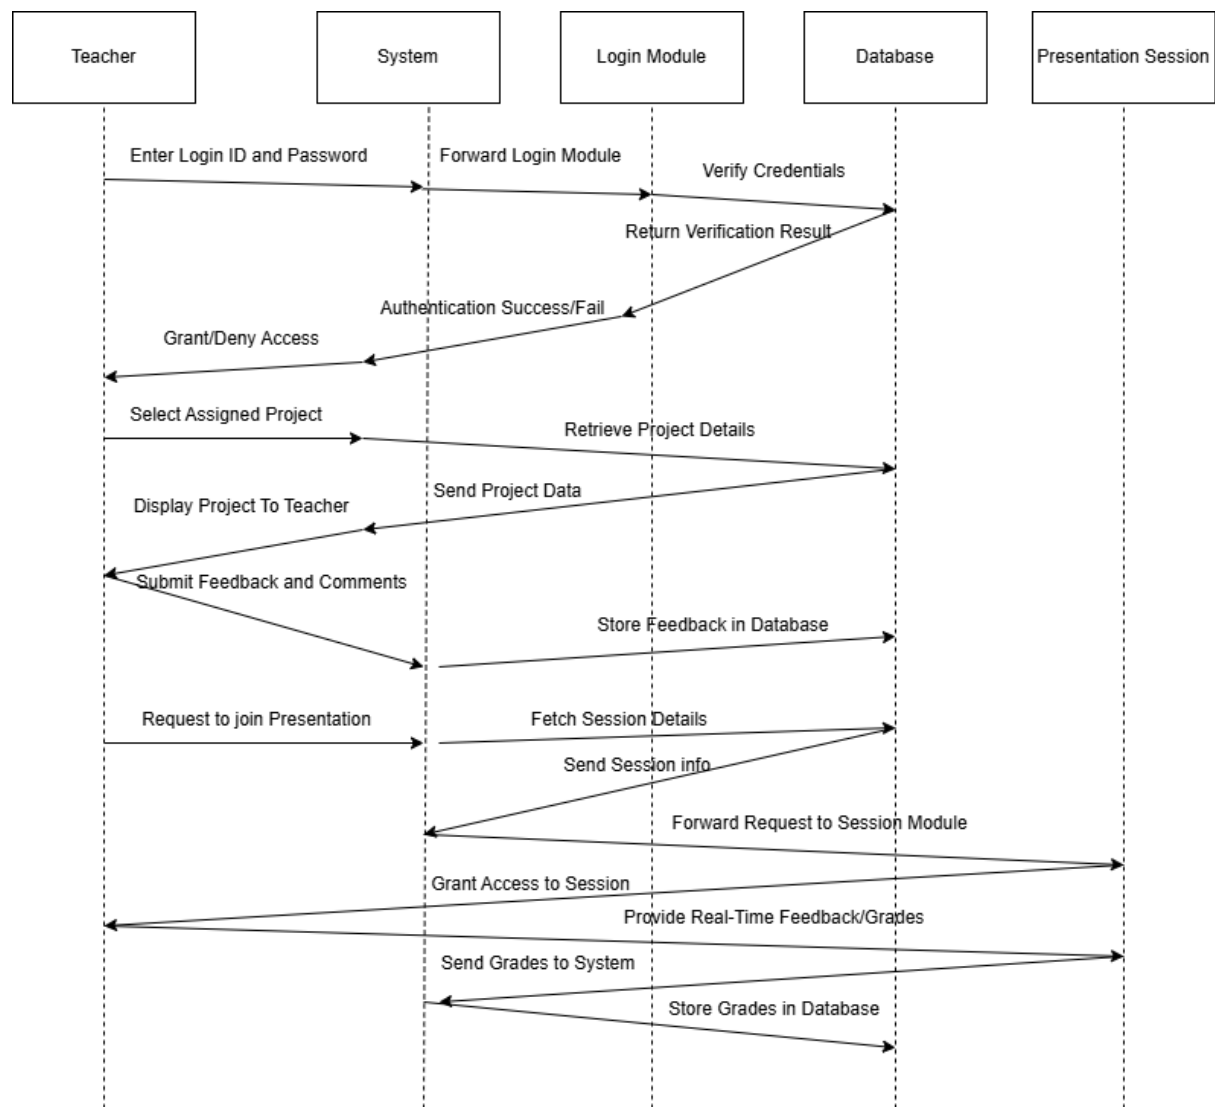

Figure 8:Sequence diagram for Teacher Module

### Project Coordinator Module (PCM)

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R3-F-1.0	The system allows the project coordinator to login	Coordinator Login	Must Have
R3-F-2.0	The system enables project coordinators to manage project drives	Project Drive Management	Must Have
R3-F-3.0	The system allows scheduling of presentation times and venues	Presentation Scheduling	Should Have

### Activity Diagram

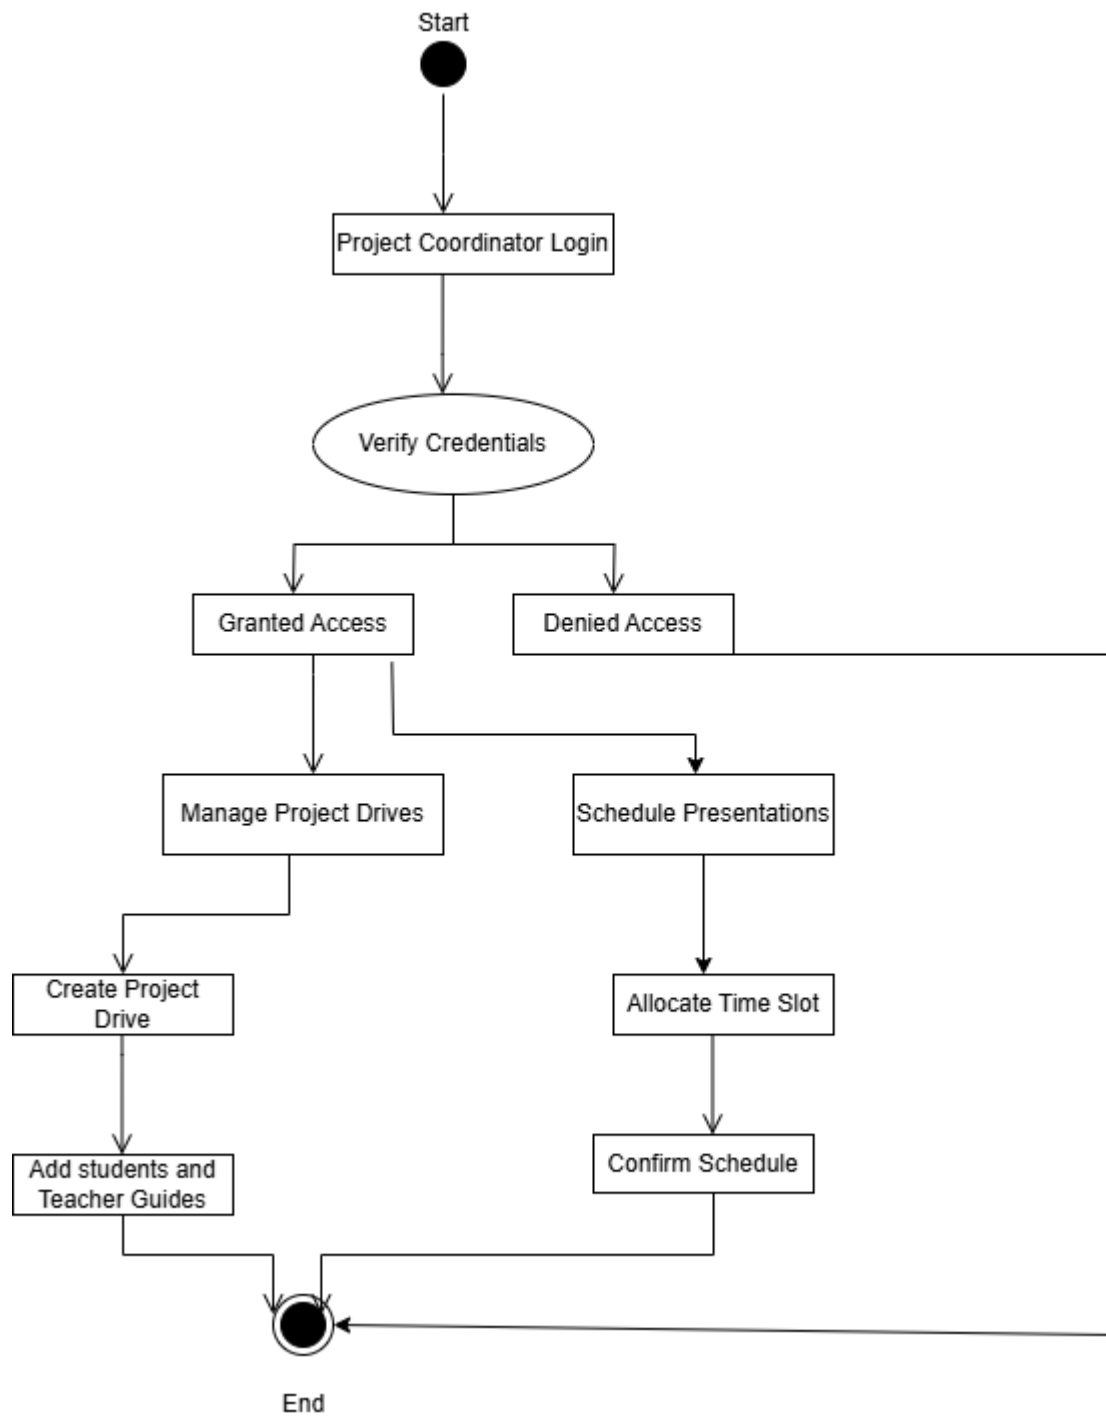

Figure 9:Activity diagram for Project Coordinator Module

## Use Case Diagram

Figure 10: Use case diagram for Project Coordinator Module

## Sequence Diagram

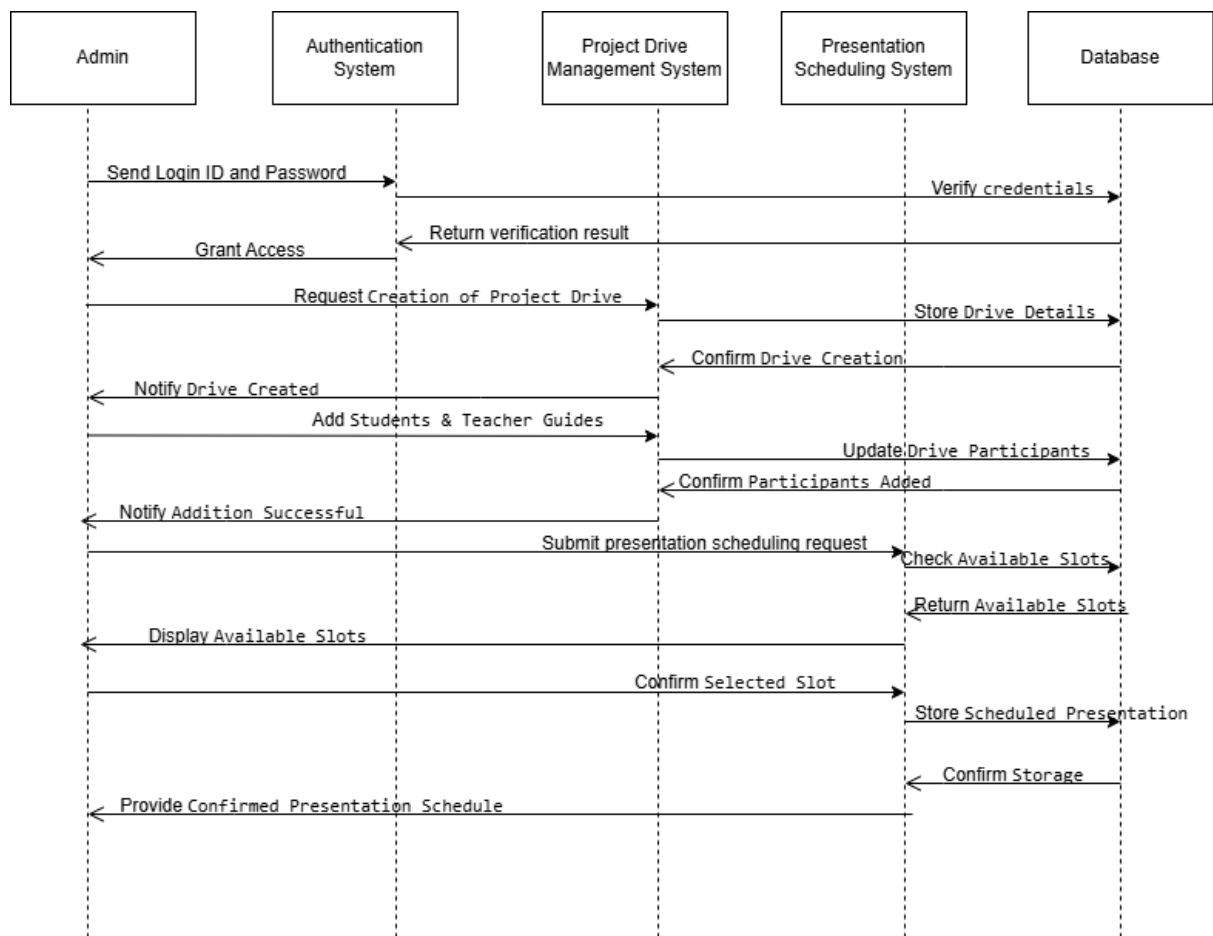

Figure 11: Sequence diagram for Project Coordinator Module

## AI Checking Module

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R4-F-1.0	The system allows users to upload documents for AI analysis	Document Submission	Must Have
R4-F-2.0	The system analyses the document for AI-generated text patterns and markers	AI Content Detection	Must Have
R4-F-3.0	The system generates a detailed report highlighting AI-generated sections	Report Generation	Must Have
R4-F-4.0	The system provides feedback and recommendations for improving content authenticity	Feedback and Recommendations	Should Have
R4-F-5.0	The system performs an overall AI checking process and evaluates AI-generated content percentage	Overall AI Checking	Must Have

## Activity Diagram

## Plagiarism Checking Module

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R5-F-1.0	The system allows users to upload documents for plagiarism detection	Document Submission	Must Have
R5-F-2.0	The system analyses the document by comparing it with a database and online sources to detect plagiarism	Plagiarism Detection	Must Have
R5-F-3.0	The system generates a detailed plagiarism report, including matching sources and percentage of plagiarism	Report Generation	Must Have
R5-F-4.0	The system provides feedback and recommendations to improve originality and avoid plagiarism	Feedback and Recommendations	Should Have
R5-F-5.0	The system performs overall plagiarism checking and evaluates the percentage of plagiarized content	Plagiarism Checking	Must Have

## Activity Diagram

## Sequence Diagram

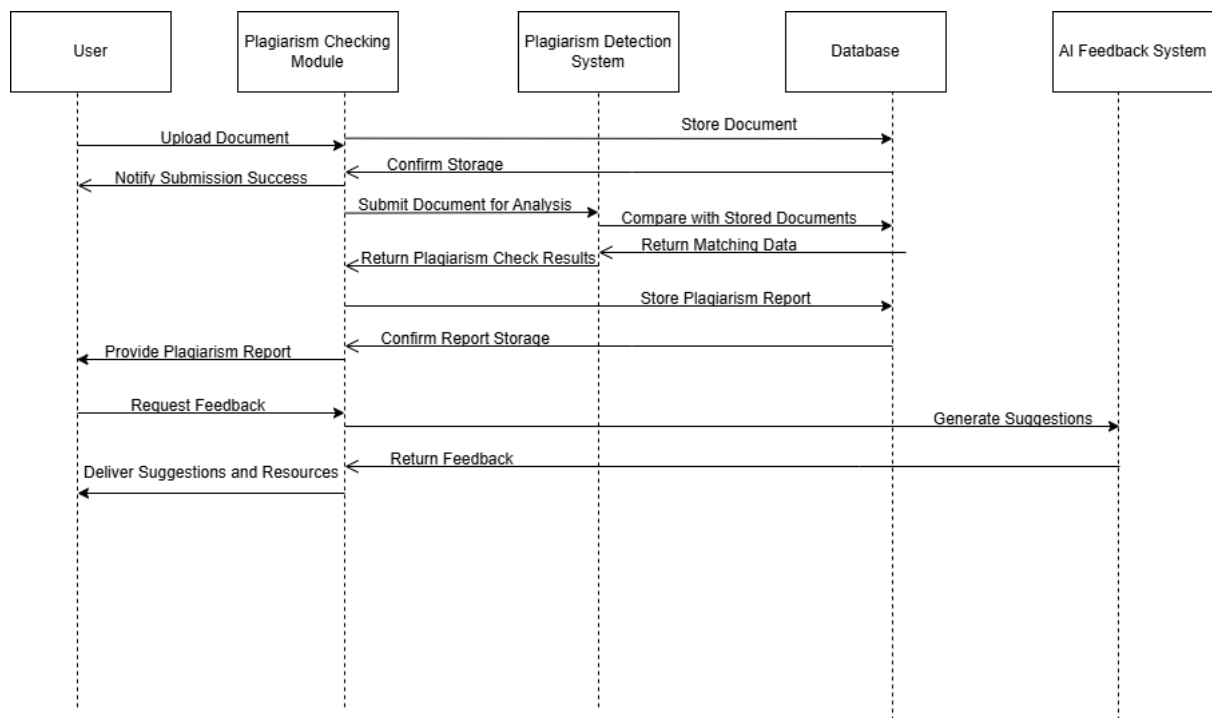

Figure 17: Sequence diagram of Plagiarism Checking

## Collaboration and Communication Tools

Req. Code	Requirement Description	Use Case	Moscow Prioritization
R6-F-1.0	The system allows users to send messages to individuals or groups	Messaging System	Must Have
R6-F-2.0	The system enables users to upload and share files with designated users or groups	File Sharing	Must Have

Test Case:

White Box Testing:

Sl. no.	Test Case	Expected Output	Test Result
1	Enter input for registration	Registration Successful message and redirect to homepage while storing the data in the database	Successful
2	Enter invalid input	Error message	Successful
3	Enter valid username and password and log-in	Login Successful message and redirect to homepage	Successful
4	Enter invalid	Error message	Successful
5	Upload Documentation Files	File Successfully uploaded	Successful
6	Read feedback provided by Teachers	Show feedback	Successful
7	Evaluate file and provide marks	Access to the file and marks uploaded	Successful
8	Provide feedback to students	Feedback uploaded	Successful
